

The Ultimate Electromechanical Vibratory Feeder

JVI offers the ultimate electromechanical vibratory feeder that eliminates the maintenance issues inherent with belt feeders and natural frequency vibratory feeders. Based on Joest single mass technology, JVI vibratory feeders deliver high capacities, repeatable performance and trouble free service. Innovative static chutework supports and control packages are available. JVI also manufactures grizzly feeders and vibratory screening equipment.

MODEL FUF With Integrated Hopper Package

Applications:

- ✓ Hopper discharge
- ✓ Stockpile reclaim
- ✓ Railcar unloading
- ✓ Crusher feeding

Benefits:

- ✓ Low maintenance.
- ✓ Repeatable performance.
- ✓ Excellent control packages available.
- ✓ World-class Joest electromechanical drives.
- ✓ Designs available for capacities up to 2500 TPH.
- ✓ Simple rugged design eliminates exciter springs and tuning problems.
